

Bay-Area Radiation Transport (BART), a Research-purpose Parallel Transport Code Framework

Weixiong Zheng¹, Joshua Rehak¹, Rachel Slaybaugh¹

¹Nuclear Engineering, University of California, Berkeley

- 1 Introductions
- 2 Equations and Discretizations
- 3 Finite Elements and Linear Algebra
- 4 Meshing Capability
- 5 Unit Testing, Continuous Integration and Code Coverage
- 6 Conclusions

Introductions

optionally give it a frame name

optionanlly give it a block name

- Fill this section up.

Equations and Discretizations

optionally give it a frame name

optionanlly give it a block name

- Fill this section up.

Finite Elements and Linear Algebra

optionally give it a frame name

optionanlly give it a block name

- Fill this section up.

Meshing Capability

optionally give it a frame name

optionally give it a block name

- Fill this section up.

Unit Testing, Continuous Integration and Code Coverage

optionally give it a frame name

optionanlly give it a block name

- Fill this section up.

Conclusions

optionally give it a frame name

optionanlly give it a block name

- Fill this section up.
